Facility Description (choose one)		
<input type="checkbox"/> Multi-family residential development with three or more units		
<input type="checkbox"/> New source commercial, industrial resident, or institutional structure under the same ownership, with at least 4,000 gross ft ² of impervious surface		
<input type="checkbox"/> Redevelopment, renovations, or additions to existing commercial, industrial, residential, or institutional uses which result in a total impervious surface area of greater than 4,000 gross ft ²		
<input type="checkbox"/> Any activity that disturbs one acre or more of land		
<input type="checkbox"/> Other (provide description):		

Water Pollution Control

Storm Drain Information

Is the business or activity on this property new or existing?

☐ New ☐ Existing

If existing, is the drainage system connected to a City main?

☐ No ☐ Separate Storm Drain ☐ Combined Sewer

Does the property discharge into any receiving water(s)?

☐ Yes Name(s) of receiving water(s):

Will the facility be located in an existing vacant building (i.e. Industrial Park)

☐ Yes ☐ No

If the property has any storm drain connections or proposed connections to the City storm drain or combined sewer, list the following:

<i>Pipe Diameter</i>	<i>Description of connection/discharge point</i>	<i>Existing or Proposed</i>

Does the property have or propose to install any of the following stormwater management measures (check all that apply)?

On site infiltration, flow attenuation, and pollutant removal of runoff on-site to existing areas with grass, trees, and similar vegetation and through use of open vegetated swales and natural depressions

☐ Yes ☐ No ☐ Planned for future implementation

Retention and evaporation of stormwater on rooftops or parking lots

☐ Yes ☐ No ☐ Planned for future implementation

Use of stormwater on-site to replace water used in industrial processes or for irrigation

☐ Yes ☐ No ☐ Planned for future implementation

Stormwater detention structures for the temporary storage of runoff, which is designed so as not to create a permanent pool of water

☐ Yes ☐ No ☐ Planned for future implementation

Stormwater retention structures for the permanent storage of runoff by means of a permanent pool of water

☐ Yes ☐ No ☐ Planned for future implementation

Are there any changes or expansion(s) planned in the next three years that would affect the volume or pollutant concentration of the stormwater?

☐ Yes ☐ No

Business Activity

Give a brief description of all operations at the facility, including primary products or services. Attach additional sheets if necessary.

Spill Prevention

Is there or will there be any outdoor chemical storage containers, bins, ponds, etc. at the facility?

☐ Yes ☐ No

If yes, attach a description of their location, contents, size, type, and frequency & method of cleaning. Also indicate in diagram the proximity of the containers to any storm drain.

Describe any type of spill prevention measure that is in place to prevent the container, bin, or pond from leaking into the storm system

At this facility, an accidental spill from outdoor chemical storage contains, bins, or ponds would lead to (check all that apply):

- ☐ Onsite disposal system
- ☐ Body of water
- ☐ Storm drain
- ☐ Ground
- ☐ Other _____
- ☐ Not applicable/no possible discharge to any of the above

Does the company have an accidental spill prevention plan that addresses the potential for release to the municipal storm drain system?

- ☐ Yes (attach a copy)
- ☐ No
- ☐ Not applicable

Please describe any previous spill events and remedial measures taken to prevent their reoccurrence (if applicable)

Stormwater Management Plan Checklist

The applicant is responsible for submitting a stormwater management plan. This plan shall include, but is not limited to, the following (*More information can be found in the Chicopee Stormwater Management Ordinance Chapter 231, Section 4, Part C*)

1. ☐ Locus Map
2. ☐ Drainage area map showing location of existing and proposed utilities
3. ☐ Topographic survey
4. ☐ Soil investigation
5. ☐ Description of all watercourses, impoundments, and wetlands
6. ☐ Delineation of 100-year flood plains (if applicable)
7. ☐ Peak groundwater levels
8. ☐ Cross sections of brooks, streams, drainage swales, and the method of stabilization
9. ☐ Location of easements
10. ☐ Proposed improvements
11. ☐ Structural detail of drainage systems and stormwater management area
12. ☐ Timing schedules and sequence of development
13. ☐ Operation and maintenance schedule
14. ☐ Notes on drawings for materials used, construction specs, and typicals
15. ☐ Calculations for hydrology, hydraulics, and structures
16. ☐ Construction erosion plan

Authorized Representative Statement

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
